

Dakota Stackable Conveyor

Channel frame construction provides the rigidity needed to repeatedly use and transport Dakota's versatile stackable conveyors. Belt widths of 24", 30" or 36" are available in lengths up to 60 feet. Bolt-on radial undercarriages, collecting hoppers and other options are available to suit your custom needs. With over 20 years in the business, Dakota know how to get you a quality product fast, made with integrity, in the USA. That's the Dakota way.
